

Subject: Open Introduction

Hi,

I'm reaching out to introduce myself and share my CV directly.

I started out on the factory floor as an SMT machine operator, served as an IAF avionics technician, and worked as a process engineer at **RH Electronics**, **PCB Technologies** and **Aleph Tav**. After completing my B.Tech in Software Engineering, I spent 15 years in digital product design—leading design teams at **Netcraft** and **Nexar**, co-founding an 80-person software agency (IdeaSoft), co-founding the *Custom Angels* non-profit, and handling lead product design at SolarEdge.

Life recently brought me back to Nof HaGalil to support my parents. Wanting to stay productive during this transition, I returned to my roots on the manufacturing floor, currently working in Quality Control (QC) inspection at **SolarEdge's** Tziporit plant.

I am open to a wide range of roles where my experience can add value - whether in product design, software, process engineering, or hands-on quality and operations. My focus is simply to bring a dependable work ethic and practical problem-solving to a strong team.

I am attaching my CV and would welcome the chance to connect if you see a potential fit within your organization.

Best regards,

Leonid Jack

Leonid Jack

Product Design Leader & Software Engineer

Nof HaGalil, Israel | jack@jacksdesign.net | 0547465422 | <https://jacksdesign.net>

2026 – Present | SolarEdge Technologies (Tzipporit) - *Quality Control Inspector (QC)*

- Overseeing production output from assembly lines, conducting quality inspections, and enforcing technical compliance for hardware components.

2024 – Present | Jacks Design & Web Architecture - *Independent Web Architect*

- Designed, developed, and currently self-hosts high-traffic global platforms, including semichaschaver.com for an international rabbinical educational organization.

2022 – 2024 | SolarEdge Technologies - *Lead Product Designer*

- Led product UX/UI for external Residential, Commercial, and Industrial applications, internal R&D tools, and mobile Dark Mode implementation.

2021 – 2022 | Eleos - *Director of Product Design*

- Directed B2B product design for AI-fueled therapy dashboards, integrated Zoom apps, and rebuilt company assets into a unified design system.

2018 – 2021 | Jacks Design - *Independent Freelance Designer*

- Provided hands-on branding, web application, and interface design for major tech clients including Checkmarx and SimilarWeb.

2015 – 2018 | Nexar - *VP UX & Design*

- Directed product design (80%) and branding (20%) for AI driving assistance platforms, V2V networks, fleet management, and smart city dashboards.

Mid-2010s | IdeaSoft (Kharkiv, Ukraine) - *Co-Founder & Head of Design Operations*

- Co-founded and scaled a custom software and design agency from 2 to 80 employees (engineers and designers), overseeing full recruitment and operational delivery prior to its corporate acquisition.

2014 – 2015 | Netcraft - *VP UX & Design*

- Managed 40 in-house and out-staffed UX/UI designers for enterprise clients including Bezeq, Amdocs, Durex and Wobi. Led design events and workshops.

2012 – 2014 | Neura - *Head of UX & Design*

- Designed IoT hardware interface concepts and digital UI/UX solutions for LG, GE, and Samsung.

2007 – 2012 | Inkod-Hypera Design - *Junior Designer*

- Transitioned from hardware engineering to digital interface design under the direct mentorship of Ilan Dray.

1999 – 2003 | Ort Braude College, Karmiel- *B.Tech in Software Engineering*

1997 – 2007 | Foundational Electronics - RH Electronics & Aleph Tav

- **RH Electronics:** Advanced from assembly line operator to Process Engineer, directing chipboard production for clients including Nvidia.
- **Aleph Tav:** Managed specialized military and defense hardware manufacturing workflows near Tower Semiconductor.

1994 – 1997 | Israeli Air Force (IAF) - Aircraft Electrician & Avionics Technician

- Maintained, diagnosed, and repaired computer, navigation, and electrical wiring systems on military aircraft.

COMMUNITY LEADERSHIP - Custom Angles | Co-Founder

- Co-founded a non-profit volunteer motorcycle network providing support, intervention, and protection for children dealing with bullying and severe social distress.
